#4643 Duhat st. Adcnai San Vicente Ferrer Camarin Caloocan City

Skills

- Proficient in design tools such as Adobe Photoshop and Canva
- Strong eye for visual aesthetics and user-friendly design
- Skilled in front-end web development using HTML, CSS, Bootstrap, and JavaScript
- Familiar with backend integration using Firebase
- Experience with Java for general-purpose and object-oriented programming
- Quick to learn new technologies and apply them in creative projects

Seminars and Certifications

- Generative AI in Virtual Reality (April 2024)
- Cyber Security (Nov 2024)
- FreeCodeCamp – JavaScript Algorithms and Data Structures (May 2023)

About me

I'm a creative and tech-savvy individual with skills in design (Adobe Photoshop, Canva) and web development (HTML, CSS, Bootstrap, JavaScript, Firebase, Java). I've completed certifications in Generative AI, Cyber Security, and JavaScript Algorithms, and I'm always eager to learn and grow in dynamic environments.

Projects

Digital Journal
https://digital-journal-scc-2025.web.app/

A full stack web application i made using **html, css, bootstrap, javascript** and **firebase**

Aquapits Solutions
https://aquapits-solutions.netlify.app/

A static front-end webpage for an aquarium services business made using **html**, **css**, **bootstrap**, **javascript** and javascript libraries such as **typed.js** and **aos**. i also integrated an api called **Email.js**

iClare
https://aquapits-solutions.netlify.app/

Similar to aquapits solutions a frontend website i designed for a small school project using **html**, **css**, **bootstrap**, **javascript**, **aos(animate on scroll).**

Wedding invitation websites
https://josh-jens-wedding.netlify.app/
https://khei-sofies-wedding.netlify.app/

I was commisioned to work on a wedding invitation but on a website, this website displayed all the wedding details such as location, motif etc.

made using **html, css, bootstrap, javascript**

I hereby confirm that the above information are nothing but truth and in best of my knowledge
